

Philips Lighting Capital enables us to use state-of-the-art lighting

The best lighting for horticulture without any payment in advance

In these times when it can sometimes be difficult to obtain financing, we are offering **Philips Lighting Capital**.

We understand better than anyone just how important it is to invest in new technology now.

It is the only way to stay ahead of the competition. Thanks to **Philips Lighting Capital**, you can benefit from innovative lighting straight away without having to make substantial investments in advance.

The Delicious lettuce-growing company in Beesel in Limburg is currently building a closed climate-controlled cell in which it propagates its own plants. Cultivating plants under LED lighting and fully controllable climatic conditions is a unique approach.

“We will soon be producing lettuce straight from seed, and this entire project would not have been possible without Philips Lighting Capital!”

Roy en Mark Delissen.

PHILIPS
LIGHTING CAPITAL

Philips Lighting Capital is made possible by Philips Lighting and that means the financing it provides comes from a reliable source.

Philips Lighting Capital is a cash-flow-friendly solution. It has been developed specifically to ensure growers to have access to the proven advantages of state-of-the-art lighting solutions, without having to make hefty investments upfront. The total cost of the lighting plus the installation cost are added together and spread over a period of three or five years, for example. This means you pay a fixed sum each month until the entire project has been paid off. In the meantime, you benefit from the many advantages of the lighting recipe, such as energy savings, efficient use of space, and better and more consistent plant quality.

The advantages of Philips Lighting Capital for you:

Benefit from new technology straight away

New lighting solutions that offer great advantages but are expensive to purchase are brought within your reach by **Philips Lighting Capital**, enabling you to take advantage of new developments precisely when it suits you best. When the agreement comes to an end you can once again change over to the most up-to-date technology available at that time, so that you always benefit from the latest developments in the field of lighting.

Enjoy all the advantages of the new lighting even before you have paid all the installments

Thanks to lower energy costs and more efficient use of space, you will save more than you have to pay out in each monthly installment.

Tailor-made solution

You don't have to waste your valuable time on banking matters. **Philips Lighting Capital** is a solution that is tailor-made to suit your specific requirements.

There are various forms of financing available, depending on whether you wish to also take advantage of subsidies and/or to arrange financing for installation and maintenance as well.

Backed by Philips

Philips Lighting Capital is made possible by Philips Lighting and that means the financing it provides comes from a reliable source.

Reduced pressure on your budget and cash flow

Because you are investing in the right technology without any high capital expenditure, you are able to use your (valuable) liquid assets in other areas of your company, where they can help promote the company's success. More effective management of your planning and finances.

Spreading the cost makes it easier to budget. Because your payments are easier to manage, you know exactly what payments need to be made and when.

In other words, because you pay a monthly sum your budget is still available for other purposes and yet you are able to benefit immediately from better quality lighting and energy savings. And, furthermore, your existing bank facilities for working capital will continue to be available for your regular day-to-day outgoings.
