# COMMERCIAL GROW

## GENERAL USE GUIDE

Use during the vegetative stage of all crops to improve nutrient conditions for better crop size. Applications to the soil as a drench or through irrigation produce the best results. Commercial Grow can be used in soil, soilless media, deep-water culture (DWC) systems, nutrient film technique (NFT) systems, and any other traditional or hydroponic growing system. This product is tank-mix compatible with other fertilizers, except calcium-based and magnesium-based fertilizers. For fertigation systems, calcium-based fertilizers and magnesium-based fertilizers should have their own respective tanks. In the case where only one proportioning piece of equipment is present, calcium-based fertilizers and magnesium-based fertilizers should be applied separately after the application of Commercial Grow.

## CONTINUOUS LIQUID FEED

### Injection Ratio

|                     | No Injector            | 1:25                     | 1:100                     | 1:200                     |
|---------------------|------------------------|--------------------------|---------------------------|---------------------------|
| Commercial Grow     | 3.17 g<br>(0.11 oz)    | 79.25 g<br>(2.8 oz)      | 317.0 g<br>(11.9 oz)      | 634.0 g<br>(22.4 oz)      |
