COMMERCIAL MICROBES

GENERAL USE GUIDE

Use during all growth stages of all crops to improve mycorrhizal and bacterial associations with plants for optimizing overall plant mass and yield. Applications to the soil as a drench or through irrigation produce the best results. Commercial Microbes can be used in soil, soilless media, deep-water culture (DWC) systems, nutrient film technique (NFT) systems, and any other traditional or hydroponic growing system. This product is tank-mix compatible with other fertilizers and soil amendments.
